

PRESS RELEASE – DECEMBER 8, 2020

THE DELAGE D12 VOTED MOST BEAUTIFUL CAR IN THE WORLD
THE FIRST DELAGE HYPERCAR WINS THE BEST DESIGN AWARD
FROM THE AUTOMOBILES AWARDS 2020-2021

The Delage D12 in front of the Sporting-Club, in Monaco.

Delage-Automobiles is pleased to announce that its first Hypercar, the D12, has won the Best Design Award of the 2020-2021 Automobiles Awards, making it, according to the Jury composed of a panel of automotive and design specialists, "the most beautiful car in the world in 2020-2021".

Delage is extremely honored by this distinction from the Automobiles Awards which, for their 3rd edition, brought together such prestigious brands as Porsche, Aston Martin, Mercedes, BMW, Audi, Lexus, and many more.

Produced exclusively by the internal team of the Delage-Automobiles Design Department, the design of the D12 is unique, drawing inspiration from both Formula 1 and fighter-jets, in a way intended to be futuristic while using lines of timeless purity.

The whole being intended to arouse a very strong visual emotion, while demonstrating an exceptional aerodynamic efficiency, the D12 generating twice more downforce than any other Supercar or street-legal Hypercar.

Laurent Tapie (CEO of Delage), receives the Best Design Award from a member of the Automobile Awards 2020-2021's jury.

The D12 Show-Car, which has already been admired during private presentations in California, Monaco, Geneva and Paris, continues its world tour with presentations in the Middle East (until January 2021) then in Asia (from February 2021), before a return to Europe scheduled for spring.

The running prototype is, for its part, being assembled in France, for initial tests and settings on the FIA approved track of Magny-Cours with Delage driver Jacques Villeneuve in spring 2021; and first clients test-drives scheduled for summer 2021.
